

# Insight

Bridging the gap: Careers in data science

# Overview

- I. What does a data scientist do? What are examples of what data scientists do in industry?
- II. What are the skills that companies and hiring managers look for in data scientists?
- III. How does Insight help people transition from academia to DS?

# Who am I?

**BOSTON  
UNIVERSITY**

**Allen Chang**  
**PhD, Cognitive Neuroscience**

IN

**MediaMath**

What does a data scientist do?

# What is data science anyways?

Analytics

Data  
Products

Machine  
Learning

Engineering

# Data science is a broad term

- Analytics, experimentation, visualization, and data stories.
- Example: A/B Testing (Multi-Armed Bandit)

# Data science is a broad term

- Data Products and Dashboards

# Data science is a broad term

- Machine Learning

# Data science is everywhere

## HEALTH

Memorial Sloan Kettering  
Flatiron Health, ZocDoc

## MEDIA

The New York Times  
MTV, Netflix  
Nielsen

## SOCIAL

Facebook  
Twitter  
LinkedIn

## FINANCE

Bloomberg  
Capital One Labs  
AmEx

## ADVERTISING

Sailthru  
Tapad  
Dstillery

## ENERGY

Bright Power  
EnergyHub

## TRAVEL

AirBnB  
TripAdvisor

## APPAREL

Rent the Runway  
StitchFix  
Bonobos

## RETAIL

Etsy  
Macy's  
Birchbox

## GOVERNMENT/NON-PROFIT

The City of NYC, The Census Bureau  
DataKind, Murmuration

# Industry example #1: News and Media

- Types of problems you might need to solve if you worked in the news and journalism space
  - What headlines do we show each user?
  - What pictures associated with stories should we show?
  - At what time of the day should new content be released?
  - What advertisements should be with which articles?

## Industry example #2: E-commerce and Retail

- Types of problems you might need to solve if you worked in e-commerce

# Job of a scientist

- Collect and clean data
- Use programming and statistics knowledge to discriminate between signal and noise
- Convey results to the scientific community

# Job of a **data** scientist

- Collect and clean data
- Use programming and statistics knowledge to discriminate between signal and noise
- Convey results to the **team/company/investors**
- **Make data-informed decisions that directly impact the product and ultimately the business**

What are the skills that companies and hiring managers look for in potential data scientists?

# Hiring is hard!

1. Costs lots of time and money.
2. False positives have a negative impact on short and long term work.
3. For these reasons (and more), companies seek as much evidence as they can about whether candidates have skills they need

## What evidence are companies looking for?

### Product

Identify and translate high value problems into a data problem

### Execution

Solve and validate their solution against problem-specific metrics.

### Communication

Communicate their results back to stakeholders.

# Technical Skills

# Technical Skills

- Statistics
  - How do you explain whether a test you ran was causal in a change?
- Machine learning knowledge (under the hood!)
  - How do your models work? What is the math underlying the decisions a model makes?
- Computer science fundamentals
  - Can you write code that can be integrated by other teams?
  - Can you work on shared codebases (version control / git)

# Behavioral Skills

- Are you a strong communicator?
- How do you work with other people?
- Can you complete work on a tight deadline?
- How do you take the technical details and explain it to someone that doesn't work in your field?

# How can you showcase evidence of these skills?

- Technical
  - Work on side projects!
    - Solve a data problem that you or others are having
    - Use this solution to make an actionable difference
    - Put up the code on github
- Communication
  - Write up your results and process
- Apply to Insight!

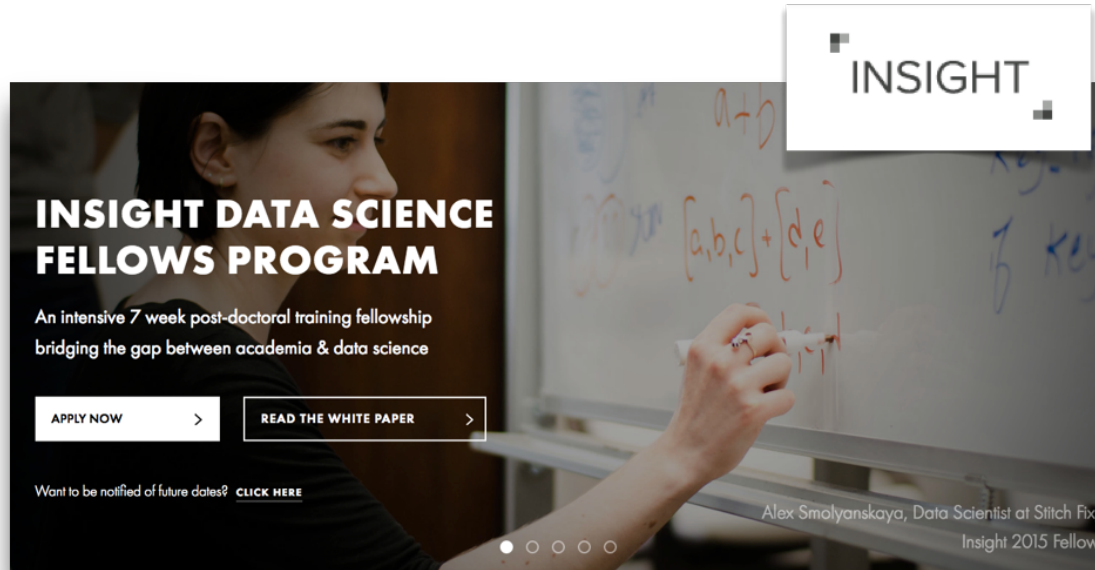

# What to consider when looking at companies

- Size of the company
  - From large corporation to startup
- What type of role are you interested in?
  - E.g. Where in the analytics < - - - - > engineering spectrum do you want to be?
  - Domain / area of interest
- Culture fit
- Mentorship

What is Insight?

# An Overview of Insight

**INSIGHT**

## INSIGHT DATA SCIENCE FELLOWS PROGRAM

An intensive 7 week post-doctoral training fellowship bridging the gap between academia & data science

Alex Smolyanskaya, Data Scientist at Stitch Fix, Insight 2015 Fellow

[insightdatascience.com](https://insightdatascience.com)

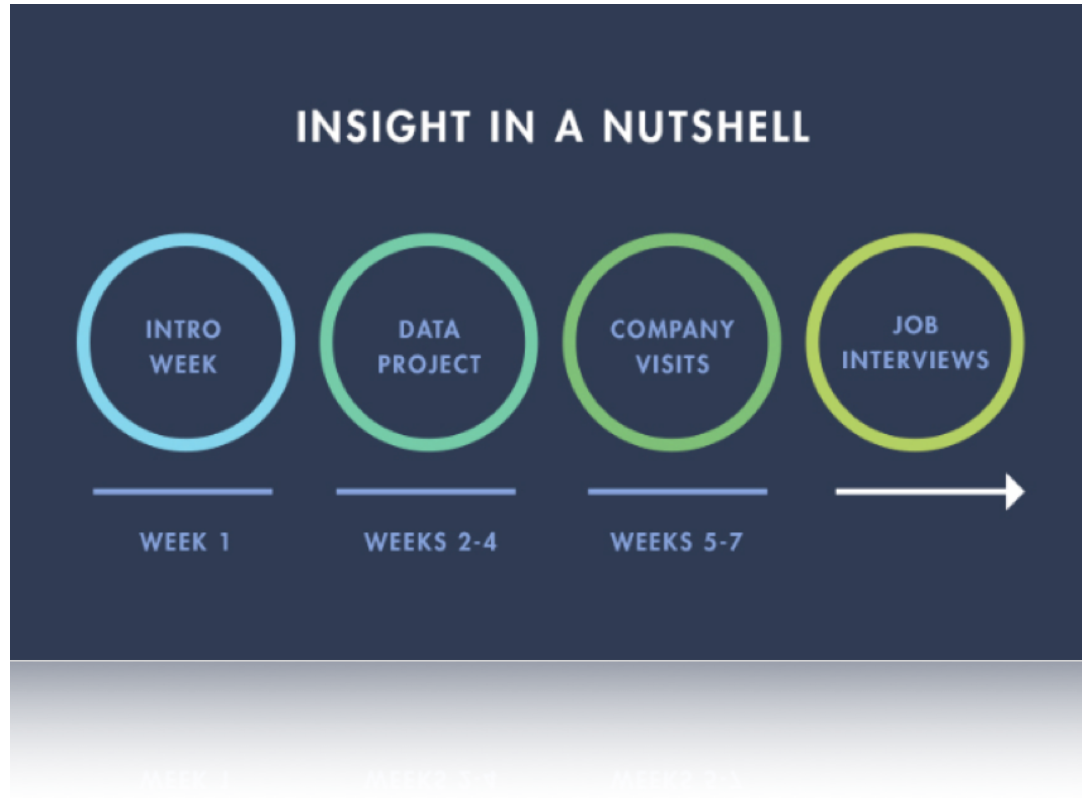

7 Weeks

\$0

Full time

Need based  
scholarship

# Our mission

# Collaborate with other scientists

# Alumni mentorship

# 3500+ Insight Fellows at

# INSIGHT

## PROGRAM

**DATA SCIENCE**  
FOR PHDS

**DATA ENGINEERING**  
FOR ENGINEERS

**HEALTH**  
**ANALYTICS**

**ARTIFICIAL INTELLIGENCE**  
FOR PHDS AND ENGINEERS

## LOCATION

**+ REMOTE**

**Next Sessions Start May**

*Application Deadline: Coming Soon!*

# Current Rutgers fellows

**Steven Boada**  
PhD, Astrophysics

Winter 2020 Data Science  
Fellow

**Melissa Kazemi Rad**  
PhD, Atmospheric Sciences

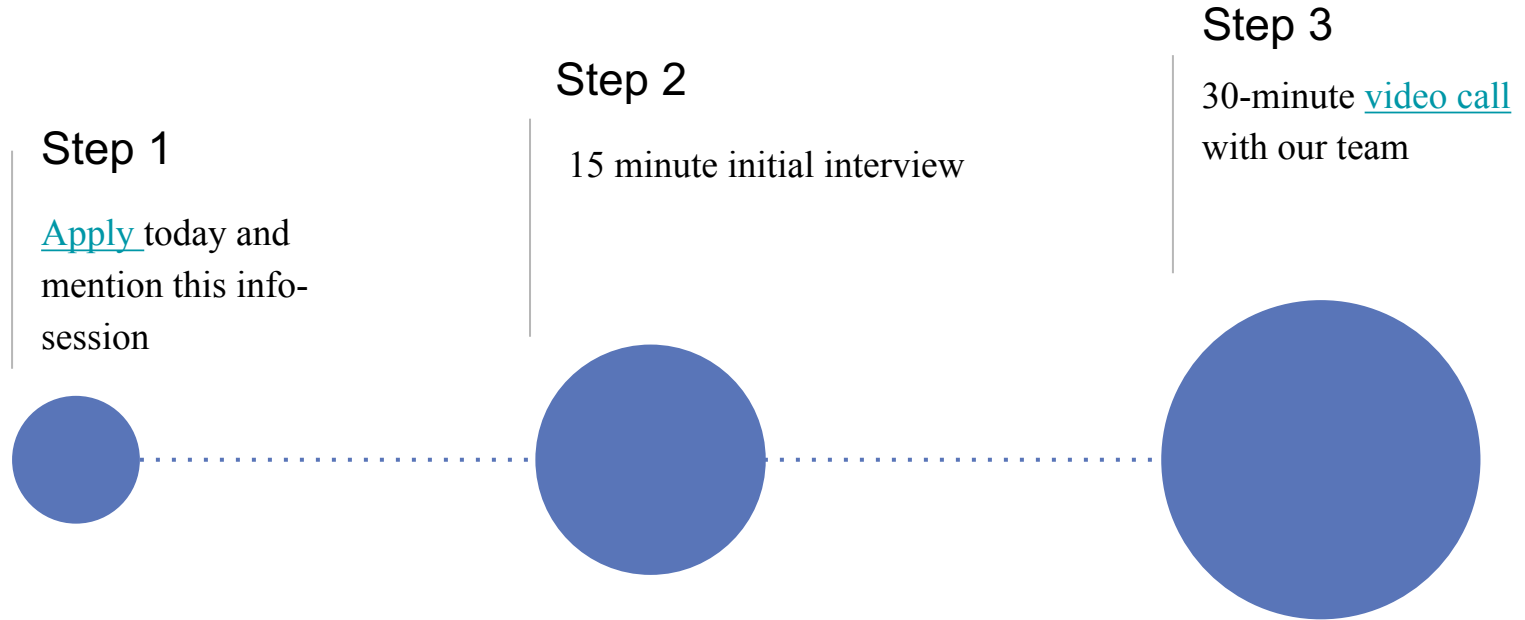

Winter 2020 Data Science  
Fellow

**Mohsen Ghassemi**  
PhD, Electrical and Computer  
Engineering

Winter 2020 Data Science  
Fellow
