

Effective Mentoring of Undergrads

This virtual workshop will use techniques and case studies from the National Research Mentoring Network (NRMN) to teach PhD students and Postdoctoral Fellows tools and skills to better mentor undergraduate students in a laboratory setting. Attendees will also reflect upon approaches they would use to mentor trainees and employees when they are running a lab or research group in the future. Follow up activities will be suggested for those who wish to get more engaged in this process.

Thursday May 5, 2022

10am-12pm
