**iJOBS Career Panel: Medical Science Liaison**

Tuesday, June 7, 2022

3:30 PM- 5:00 PM

**Robert Jensen, PharmD**

**Medical Science Liaison**

**Medlab Clinical**

[rbjensenpharmd@gmail.com](mailto:rbjensenpharmd@gmail.com)

Robert graduated from Marshall University School of Pharmacy with his Doctor of Pharmacy degree in May of 2016. Following his graduation, he served in multiple roles at CVS/Pharmacy until March of 2021. At that time, Robert accepted a role as a Medical Science Liaison with Medlab Clinical. Since being appointed as an MSL, Robert has transitioned into a Business Development and Managerial role, recently being promoted to Manager of Emerging Therapies & Commercialization for the United States.

**Jeffrey Mosenson, PhD**

**Senior Medical Science Liaison**

**Leo Pharma**

<https://www.linkedin.com/in/jeffreymosenson>

Jeffrey Mosenson, Ph.D. is a Senior Medical Science Liaison and former researcher with over 15 combined years of experience in Academia, sales, and patient care. Jeffrey entered the Ph.D. program Cell Biology, Neurobiology, and Anatomy from Loyola University Chicago in 2008 where he identified a central role for inducible heat shock protein 70 (HSP70i) in mediating autoimmune vitiligo (skin depigmentation disorder). His work also led to the generation of a mutant isoform of HSP70i which shows promise in treating vitiligo (currently in development at Temprian Therapeutics). After graduating with highest distinction in 2013, Jeffrey pursued a post-doctoral fellowship at the University of Illinois at Chicago where he studied the development of stem cells, and utilized novel genome editing techniques to treat sickle cell disease. Jeffrey received the competitive National Research Service Award for his work and served as President of the Postdoctoral Association. Jeffrey has worked as a Medical Science Liaison at Ortho Dermatologics (2017-2019) and Leo Pharma (2019-Present), where he is responsible for developing collaborations with health care providers, thought leaders, and key organizations.
